## Mark Hellbusch: Picture "Mars Field CXII - abstract landscape" (2019)

## €500.00

Mars Field CXII is a stunning abstract landscape that captures the beauty of sand, weathering and natural forms on a 30 x 24 cm canvas. The painting depicts a vibrant mound of color in shades of yellow, blue, red and green that blends harmoniously into a fine-grained, textured surface. This balance between dynamic color accents and a calm, natural background is reminiscent of the subtle structures and movements of landscapes as they are shaped by wind and time. This work invites you to discover the depth and detail up close.
