## Mark Hellbusch: Picture "RE 14" (2024)

## €3,500.00

On a radiant turquoise background, spontaneous splashes of color, drops and gestures unfold into a vibrant composition. White, yellow, blue and red combine to form a dynamic, yet finely balanced network of lines and color fields that constantly draws the eye in new directions. The creation process of "RE 14" does not follow a rigid plan, but relies on the moment of free, artistic expression. The traces of experimentation remain visible: every movement, every drop is part of an intuitive dialog between color, surface and space. The painting radiates energy and lightness at the same time. It invites you to discover the beauty of the unforeseen and to be carried away by the organic vitality of the material. "RE 14" is a work that fills modern spaces with clarity, color and subtle movement - and celebrates the freedom of the artistic process.
