Mark Hellbusch: Picture "RE 12" (2023)

€2,500.00

"RE 12" (120 x 110 cm, 2023) is a work that tells of the art of letting go and creative transformation. Two canvases from the "Organic Grounds" series that were originally perceived as imperfect were reassembled in an intuitive process. By overlapping, gluing and reworking, a living, breathing picture surface was created on which intense blue, green and yellow tones merge with each other in finely nuanced transitions. The surface retains the traces of the experimental process - a texture of layers that creates both depth and movement. The special double framing - one very narrow, the other with a shadow gap - lends the work a subtle three-dimensionality that enhances its spatial effect.
