## Mark Hellbusch: Picture "RE 13" (2024)

## €2,900.00

"RE 13" (180 x 120 cm, 2024) is a powerful work from Mark Hellbusch's "Remains of an Experiment" series that celebrates the moment of artistic loss of control. Created in a phase of free, intuitive work, the colors were not painted, but thrown, dripped and layered - a tribute to the energy of pure creative expression. Luminous layers of color run through a deep black background and create a pulsating field of tension between chaos and conscious composition. "RE 13" openly displays the traces of its creation process: the dynamics of the color throws, the rhythm of the drops, the condensation of the layers. The work looks like a frozen moment of pure energy - raw, authentic and full of movement.
