Rare squirrel - Hidden elegance in color This oil painting on canvas (40x30 cm, 2024) shows a squirrel rising gently from the abstract composition. Warm ochre, deep green and earth tones flow into one another and make the animal appear like a fleeting echo of nature - hidden, yet alive. For me, this work is a tribute to the beauty of the inconspicuous. The squirrel seems to be in motion, but remains carried by its surroundings, embedded in a soft, natural world of color. The subtle transitions between light and shadow create a calm, almost poetic atmosphere. A unique original that combines subtle movement with painterly stillness - perfect for lovers of modern, nature-inspired art.
