

Ilona Schmidt: Sculpture "Relief no. 1" (2024)

€520.00

The relief shows two torsos that are connected in a fascinating way. The clever placement of the torsos creates a harmonious composition. The relief is fixed in a frame that perfectly accentuates the work of art. The coloring of the relief was carried out with cold patina, which gives the artwork a unique and appealing look. The cold patina gives the relief a subtle coloration that makes it look lively and expressive. This special technique gives the relief a certain depth and texture that invites the viewer to step closer and discover the fine details. Work signed and dated
