

KNÖ-REI: Picture "602rel-GK" (2025)

€2,100.00

KNÖ-REI has created a geometric composition that at first glance is reminiscent of English fabric patterns. However, it invites the viewer to philosophical reflections on space and reality. In the artist's works, geometric shapes, colors and surfaces merge into a metaphysical minimalism. With a special pictorial design, she allows the viewer to enter the world of optical effects. It seems as if the motif is blurred, but everything is precisely planned and precisely painted. KNÖ-REI has painted over an existing painting and deliberately used the existing painting structures. The partial high-gloss varnish creates glossy accents that change again and again.
