

## Hasso Heybrock: Picture "ocean's brightness" (2021)

€3,550.00

Living and working on the coast shapes my everyday life and my sensations. I am fascinated by the sea, its deep and soft blue tones, its wildness, its gentleness and its depth with all the unfathomable down there. At the same time, the oceans are the origin and source of our existence. We may use them and enjoy them, we may not destroy them! This is what "ocean's brightness" is about and tries to describe these jewels with the painting flow and the wide color spectrum.
