

## **su sea: Picture "The bather I - speechless helpless homeless" (2023)**

Work from the series "The Bathers" This series is again the representation of self-confident and strong women who are depicted in primarily bright colors (Pop Art) in bathing suits. At first glance, the viewer sees only the colorful bathing scene, which suggests femininity, freedom, sexual revolution and emancipation of women. On closer inspection, another socially critical theme becomes visible, for example, an ecological issue or a reference to a critical political or social issue of the time. In the work, in addition to acrylic paints, tissue paper and graphite were used.
