

Uli Fischer Art: Picture "Heart and Love" (2022)

In the picture it has a real flood of different shapes and colors. It is created in the Christmas season and therefore also the name with heart and love. I had a lot of fun to design it and my colorful and colorful thoughts on the canvas to implement. I love this kind of art and I am happy to be an artist who does it. During the creation of the painting I also had colorful support from many Christmas songs also internationally. It is simply a typical Uli Fischer painting with many shapes and colors. The cubic shape and the different colors make it fun to look at. Every boring room makes the picture colorful and chic. I am very sure about that! Have fun wishes Uli Fischer from Lake Constance
