

Martina Rick: Picture "The seed of hope" (2011)

€3,900.00

This image was developed in an intensive and spontaneous process. It grew virtually layer by layer and a depth emerged, similar to a third dimension, which is also haptic graspable. I communicate with each applied layer, which are nevertheless filled with the momentary thoughts and emotions. Each image, each dimension applied or removed again reflects life with all its facets. Layer by layer "grow" tension-laden, powerful images. This is done with highly abstracted schemes and "signs" that always only traces come to light. The structures applied in several layers communicate with each other and let fantastic stories arise. My inner visual world is thus transformed to the emerging image.
