

Michael Rofka: Picture "New life" (2017)

€3,500.00

When looking at this picture may most likely think of germs, egg-like structures, spawn or the like. It was not the intention of the artist to depict something concrete. Rather, he is concerned with the light bright but still somewhat mysterious atmosphere of the image, which is painted entirely in light red tones. The colors were applied in many layers which results in a spatial depth of the structures.
