

KNÖ-REI: Picture "668-FO" (2023)

€1,600.00

A construction of triangles and squares with a strong three-dimensional effect. Architectural forms served as inspiration. On closer inspection, however, spatial perspective proves to be only apparent. Our attempts to resolve the alignments and recognize the roofs of the houses are repeatedly lost in an abstract, geometric cosmos. The composition is a visual echo of my soul - passionate and unfathomable :-). Perhaps this is precisely why the motif captivates its viewers. The central point is the triangle created with silver acrylic, which, depending on the incidence of light, either glows intensely or can be seen as a gray surface.
