

Ilona Schmidt: Picture "Fragments of silence" (2025)

€1,500.00

The monochrome work unfolds a fascinating dynamic through the contrasting overlapping of black and white. A multitude of rectangular and irregular brushstrokes create a rhythmic composition reminiscent of an abstract cityscape or a fragmented mosaic. The soft blurs and sharp edges create a balance between movement and structure. Despite the limited color palette, the picture appears alive, as if oscillating between light and shadow, order and dissolution. Picture dated and signed
