

Sabine Schramm: Picture "Oranges / oranges (plant no. 200804)" (2020)

In early spring on the Costa de Azahar - the "Orange Blossom Coast" - in the Valencia region on the Mediterranean Sea in Spain - there is a very special scent in the air: the sweet smell of orange blossoms opening by the thousands. Wonderful! At the same time, the ripe fruits are still hanging on the trees, waiting to be harvested. A sight and a scent that always enchants and inspires the artist again and again! The picture is delivered directly ready to hang in a smooth white lacquered frame (40x40x3.5 cm) - a high-quality, timeless solid wood frame, which is very restrained by its simple elegant form and highlights the image all the more for it. If instead of this frame you prefer another frame, this is of course possible (please notify before purchase).
