

Michael Bajer: Picture "Corona summer" (2022)

€4,100.00

The first work of the new series Disrupted figurescapes. It depicts the Corona summer of the 20s. The people are depicted realistically. Bajer wants to depict the distractedness of today's world through the disrupted elements. The appearance of the subject is thereby rearranged, giving the image new meanings and associations. The painting also contains collage-like elements and abstract areas in which he works a lot with effects and striking brushstrokes.
