

## **Fehrmann: Picture "Lawn piece, butterflies" (2020)**

**€4,750.00**

The Hamburg artist and art award winner Uwe Fehrmann takes us in his colorful painting in a detail shot of a patch of grass with its plants and insects. Three-dimensional patterns, lines and shapes overlap - wavering between sharpness and blurriness. Suddenly there are butterflies to be discovered in this almost informal work of art, as in a still image, painted naturalistically. Through the many different layers and image levels, the light plays with this painting and allows the viewer to discover ever new details. Not by chance, parallels can be found with the lawn piece by Albrecht Dürer.
