

Anja Struck: Picture "the mystery of the sea" (2023)

€2,700.00

A seascape in long landscape format. The figures are part of the landscape. The viewer is drawn into the work of art and experiences himself as part of the scenery. The special mood in this image is achieved by the typical blur for me: the motifs and contours blur and dissolve into veils of color. The signature is on the back.
