

Hasso Heybrock: Picture "northern summer 1" (2020)

€710.00

Northern Summer 1 describes the beauty of summer in the far north. With the onset of spring, the radiant light returns, accentuating the beauty of this landscape. With the flat land and high sky, the seasons in the north seem particularly intense. Depressing in the gray winter, exhilarating in the radiant summer months. Especially now at the summer solstice the light is very intense. Everyone is in a positive mood and celebrates life. This is what the works northern summer 1 to 4 are about. The yellow basic mood of the works symbolize the light and warmth, the running forms show the flow of life.
