

su sea: Picture "The bather XIV - no limits!" (2024)

The "bathing women" series deals with the theme of "femininity, self-confidence, self-esteem". At first glance, the viewer often only realizes the colourfully depicted bathing scene. On closer inspection, however, a small detail reveals an ecological theme, a reference to a political or social issue of current affairs or a personal focus that is currently the focus of my reflection. "Die Badende XIV- no limits", contains the wish that WOMEN become aware that they can achieve anything and that they should not impose limits on themselves. An inspiration for all women to confidently pursue their OWN goals, not to hide their talents and to follow their desires. For this work I used acrylic paints, plastic masses, paper and graphite. The picture surface therefore has structured parts.
