

José Bifano: Picture "Microscopic View" (2023)

€600.00

Microscopic View is a painting that captures the essence of the organic plant world on a micro scale. The artwork is represented by a series of cells, tissues, and cavities that intertwine in a dynamic and watery flow. I was inspired by images taken through a microscope. I am fascinated by the existence of a reality that we cannot perceive with our senses, which is why we must amplify it. The artwork invites the viewer to explore the beauty and complexity of nature at its most basic level. It is inspired by the beauty that is found in the smallest and simplest aspects of nature, which we can only know through the microscope. This artwork was created using my own technique, which uses toilet paper as a support. In its creation, I used acrylic paints, glue, toilet paper, and water.
