

su sea: Picture "The bather VIII - bittersweet" (2023)

The work has received an international art award - 6th place in the Art Collectors Choice Awards 2024, USA, California. Artists from more than 60 countries submitted their works to this art competition. The series "The Bathers" deals with the depiction of self-confident women painted in pop art style in swimwear. At first, the viewer only recognizes the colourfully depicted bathing scene. Only on closer inspection does another socio-critical theme emerge, such as an ecological, political or social issue of current affairs. Our world - bittersweet.... It has so many wonders to offer, flora and fauna, breathtaking landscapes and magnificent natural phenomena. At the same time, there are many dark sides and challenges: Wars, violence, poverty, destruction, climate change....in one word: bittersweet... For this mixed media work I used acrylic paint, graphite, paper and tissue paper.
