

Lana Frey: Picture "Dancing in the rain" (2024)

One usual rainy day, when everyone hid under umbrellas and into their houses, one girl decided to stay outside. Instead of covering under the roof she stood under the sky and began to dance. To her surprise this cheerful dance caught the rain and turned it into a game, the melody of the drops became her muse. Her laughter and joy settled in the hearts of the people who watched this dance, chasing away the greyiness and sadness.
