

KNÖ-REI: Picture "658-GK" (2023)

With the acrylic colors and clear lines, I bring vibrant energy to the canvas. The geometric shapes and minimalist aesthetics convey a sense of calm and order. It is the perfection of balance and tension that makes every room shine and invites a dialog with the art. An abstract geometric composition in warm colors and a total of 89 different nuances. The shapes overlap, creating a complex, almost spatial impression. The work was specially painted on a canvas with a very fine thread. I create the individual areas of color exclusively with brushes using an elaborate multi-layer glazing technique; the color nuances are all individually mixed by hand for this work from a few basic colors.
