

su sea: Picture "The bather IX - deepness" (2024)

The work has received an international art award - first place in the Art Collectors Choice Awards 2024, USA, California. Artists from more than 60 countries submitted their works to this art competition. The series "The Bathers" deals with the depiction of self-confident women painted in pop art style in swimwear. At first, the viewer only recognizes the colourfully depicted bathing scene. A snapshot that may give rise to thoughts on themes such as femininity, freedom and the emancipation of women. Only on closer inspection does another socio-critical theme emerge, such as an ecological, political or social issue of current affairs. The look, the expression, the thoughts.....simple: deepness.... For this mixed-media work, I used acrylic paints, graphite, paper, tissue paper and plastic masses.
