

## Uli Fischer Art: Picture "LION" (2023)

LION The lion is one of the most imposing and fascinating predators in the world. Lions are not only impressive predators, but also symbol of strength and power in many cultures. However, they are endangered due to threats such as poaching and habitat loss and are under protection. My painting is a very modern and colorful work. Lions are fascinating animals that always inspire me. I love this strength and also the grandiose expression of the eyes. Protect all animals, because they are in this world longer than mankind. The picture should be fun and bring joy as well as decorate a beautiful room. Acrylic / 2023 [www.uli-fischer.net](http://www.uli-fischer.net)
