

su sea: Picture "Bowie II" (2022)

€3,500.00

David Bowie, one of the most influential and changeable artists of his time. His inexhaustible creativity and transformability were for me the inspiration for this large-format portrait. The background of the mixed media work consists of the collaged English daily newspaper "the guardian", furthermore acrylic paint, tissue paper and graphite were used for the portrait. The translucent writing of the newspaper in Bowie's face, represents the fusion of the external appearance with our own individual ideology and world of thought. Furthermore, the work contains a quote from an interview with David Bowie (sh. photo details). The image has structure through the newspaper clippings and tissue paper. The varnish used is glossy.
