

Ilona Schmidt: Sculpture "From the sea" (2024)

€1,100.00

The sculpture entitled "Out of the Sea" is an expressive clay sculpture in shades of blue and black, finished with metal leaf. It combines organic forms with symbolic meaning: the body of the figure is reminiscent of the curved movement of a wave and conveys the dynamism and vitality of the sea. The rough, textured surface reflects the untamed nature of the ocean, while the shiny accents of the leaf metal capture the reflection of light on the water. The figure seems to rise from the depths of the sea, symbolizing a connection between man and nature. The harmonious coloring and flowing design make the sculpture a tribute to the power and beauty of water. Finished with cold patina and metal leaf after firing.
