

Irina Laube: Picture "Forest lake" (2021)

The water lily pond, a tech with water lilies The sides of the picture are painted, finally the varnish with UV protection. The ideas and inspirations for my work I take from nature with its various facets. The process of creating a picture is based on deliberate coincidence and exact development. In the center of my work are the colors, structures and forms, which I would like to implement with the different techniques in a certain harmony. Not to reveal too much, not to imitate, which also means not to dictate.
