

Sabrina Seck: Picture "greeting" (2022)

€3,900.00

The lion is the second largest cat in the world and lives in packs. The social behavior of the large and fantastically beautiful big cats includes the mutual exchange of pack odor, also called "greeting". They achieve this by rubbing each other's heads and bodies. Due to digitization and depending on the monitor settings, there may be slight color deviations.
