

## Mirek Gasz: Picture "Thirteen lives" (2023)

€2,900.00

Life has its own perspective for everyone. It is always in motion. Chance and order are important features of my painting. The figures are painted in great detail and very thickly and stand out particularly strongly against the black, matt background. This is why the figures seem to float. Colors and shapes clash in contrast. "Thirteen Lives" is a positive image of the world. It is also important to mention that the painting can be hung in any direction. In portrait or landscape format. The viewer can find his or her own perspective.
