

Jörg Herz:

Sculpture "Conductor - The right hand is used to set the beat" (2023)

€1,280.00

The topic of "conducting" has occupied me for years. What functions does a conductor fulfill? He is the coordinator of an orchestra, he shows the beat, he gives the cues, he interprets the music, he gets people to make music together, to breathe, to swing and to be silent. I feel the conductor is a metaphor for our own lives - the ultimate symbol of self-efficacy: we ourselves determine the speed and the pauses, the rhythm and the sound of what we do and who we are. The score is created within ourselves. Unique / figure about 70 cm high / with base 90 cm high / spruce and acrylic paint / wood sculpture work with the chainsaw.
