

su sea: Picture "Pablo I" (2022)

€3,000.00

An estimated 50000 works have been attributed to the famous Spanish painter, graphic artist and sculptor Pablo Picasso. He is considered one of the most important artists of the 20th century. Some of the most important advances in modern art came as a result of his artistic work. His work is characterized by a number of different periods and styles. This versatility and richness of facets inspired me to portray Picasso himself. His intensely lived life is reflected in his face and makes it so interesting to me as an artist. The mixed media work was created with acrylic paints, plastic masses, graphite and tissue paper. Furthermore, it includes lettering with a quote from Picasso and parts of a city map of Paris. The work has structure through the use of plastic masses and tissue paper.
