

Anne Samson: Picture "Bright bouquet of flowers" (2024)

€700.00

The still life is colorful and very lively, it appears bright and cheerful. A glass vase contains various flowers created by the artist's imagination. Bright green dominates the picture, a friendly, positive color. The sparing use of magenta in the large blossom complements this beautifully. The colors are expressive and the entire painting is influenced by Expressionism. Anne Samson admires this art movement because of its wonderful use of color and the reduction of the pictorial objects to the essentials.
