

Bea Schubert: Picture "Kiss Of Life No.2" (2025)

€2,000.00

My painting, inspired by Sade's soulful song "Kiss of Life", captures the tender essence of love and connection. The focal point is the symbol of two kissing fish that come to life in warm, inviting colors. The kissing fish represent harmony and the intimate dance of life. The cactus conveys stability and protection. Through this work, I want to evoke a sense of warmth, love and the magic of life's delicate interactions. The painting is painted on high-quality canvas and varnished to protect it from UV radiation. it can be hung immediately.
