

Ilona Schmidt: Sculpture "Rule the waves" (2023)

€1,600.00

"Rule the Waves" is a work of art that embodies the power and challenges of the sea. It shows a small ship bravely fighting against the raging waves. A special symbolic representation of the waves is achieved by a piece of wood, which has the shape of a wave. The sail of the ship is designed from found wood, which gives the artwork an organic and natural touch. The ship and crew are made of stoneware clay. The picture in the background (travelers) serves as a size comparison, it measures 100 x 100 cm and is not included in the offer.
