

Karin Döring: Picture "VIEW" (2024)

€2,800.00

ANSICHTSSACHE is a work of art that has the unique ability to be viewed from two different perspectives. This work can be hung rotated 180 degrees depending on the viewer's individual interpretation and preference. The painting is characterized by its bold colour scheme and contrasting use of black, white, grey and vivid accents of magenta and blue. The colors are heavily blurred and mixed in places, creating an intense, almost moving texture. The dominance of vertical stripes running through the image plays with the concept of distortion and obfuscation, creating a visual challenge to recognize the two faces hidden in the image. The ambiguity of the depiction and the variability of the hanging invite the viewer to rediscover and reinterpret the artwork time and time again.
