

Uli Fischer Art: Picture "Three sisters" (2022)

"Three sisters" A work with the faces of one of 3 women. The 3 sisters are created after a family reunion when I had a few funny ladies at the table and I noticed your facial expressions , your hair and of course the different colors on you. The picture was created after an older template , I just love it and so I revived it. The special traits I find mega and love you. Have fun with it :-)
