

Hasso Heybrock: Picture "ocean's gold" (2021)

€5,000.00

I live on the coast and am fascinated by the sea, its deep and gentle blue tones, its wildness, its gentleness and its depth with all that is unfathomable down there. At the same time, the oceans are the origin and source of our existence. We may use them and enjoy them, we may not destroy them! This is what "ocean's gold" is about and tries to describe these jewels with the painting flow and the wide color spectrum
