

Michael Rofka: Picture "Quintus" (2021)

€4,800.00

In this painting, five squares lie one inside the other. They have a reddish tone and become lighter towards the center. The picture is painted in many layers and the squares have softly flowing edges. They seem to float in a diffuse color space. They create a deep imaginary space that casts a spell over the viewer. But the picture also has a pleasantly warm color atmosphere. In any case, it is an exciting color field work. The picture does not need a frame, but can of course be framed on request.
