

Ilona Schmidt: Sculpture "We belong together" (2019)

€1,100.00

We belong together Pair of figures modeled from stoneware mass, treated with engobes and patina after firing. One figure 22 x 10 x 10, the other 17 x 10 x 10. Stoneware mass is very coarse fireclay, which after firing has a stone-like surface and is very stable. Creation process of my sculptures I work the clay by following the property of the material. I deliberately leave cracks, or tear it in the leatherhard Zustand again. The earthy structures of the clay I let visibly flow into my works. thereby I notice again and again, how the clay works in itself and what structures it brings forth, especially when using great heat. It is important to me that the work process remains visible.
