

## Heinz Stoewer: Picture "Agave" (2007)

**€980.00**

The work shows a detailed view of a desert garden with an agave in a stone field in front of a palo verde tree. It was inspired by the artist's visit to gardens planted with desert plants in Palm Springs, California. With its clear structure, the garden is reminiscent of Japanese gardens and radiates a great sense of calm. The agave and the trunks of the palo verde are placed like sculptures in the stone field in various shades of color, which in turn is bordered by concrete slabs. The calm and order of the picture create a contemplative mood. The work is signed and dated on the back.
