

## KNÖ-REI: Picture "601-GK" (2023)

In this artwork I have created a square illusion, a geometric universe. It is a construction with a complex structure and its own rules. The diagonals dominate the stripes; the work brings dynamism and energy. Through bold colors, it now radiates an optimistic lightness that associates spring with its warm sun as well as the radiant Indian summer. This painting conveys a sense of order in chaos and at the same time stimulates the imagination. It will bring a vibrant and inspiring energy to any room. Dimensions incl. frame, frame firmly attached to the work Painted on a wooden panel laminated with canvas
