

Oleg Breining: Picture "green plants" (2013)

€1,600.00

Natural spaces marked by use are the subject of my constant observations. Part of the theme are also the limited possibilities that characterize the use. Through visualization of time-related influences of certain processes, exaggeration of effectiveness, regeneration processes, maximum receptivity of interventions and reversal of habitual impressions, the view is directed to the fact that capacities have a limited endurance and in a positive sense reflect the capacity of nature to suffer. The role of man in the use of nature will be questioned.
