

KNÖ-REI: Picture "659-GK + 24 K" (2023)

€2,500.00

This golden geometry with the optical effect of a superimposition is full of tension, calm and luxury. The center of the work is the surface of 3 layers of 24 carat gold leaf, always shining like a friendly sunshine and a bit metaphysical. It radiates a warm, luminous energy throughout the work, bringing a sense of calm and enlightenment. The carefully selected shapes present the beauty of geometry with its balance and harmony. The restrained color nuances make it possible to place the work on a small wall surface. The work enhances even rooms with little natural light with a calm yet powerful presence. The special spatula technique creates surfaces with a leather-like feel and look. The textured surfaces stand in contrast to this.
