Ilona Schmidt:
Picture "White Dot 3" (2017)

€1,500.00

The picture entitled "White Dot" shows an impressive portrait in an expressionist style. The face is surrounded by a multitude of white dots, which are distributed both around the face and in the face itself. These dots give the work a dynamic and almost hypnotic effect - the use of white contrasts strongly with the vivid colors of the face and enhances the emotional intensity of the expression. The composition conveys a sense of movement and energy, while the dots create a certain blurriness and dreamlike quality. Picture signed and dated
