

Marina Krasnitskaya: Picture "Geometry" (2021)

€10,000.00

The work was done with the technique of multilayer oxidation of metals. Changing lighting in the room changes the image. Graphic elements are made of 24 carat gold and white gold. ...Through targeted use of acid baths, the previously brightly flashing metal is thereby pushed into the broken, gloomy and mysterious, whereby through subsequent brushing of the surfaces, individual sections of the metallic foil gleam anew, while others remain in the dark... The painting can be hung both horizontally and vertically.
