

Stefanie von Quast: Sculpture "Dedication" (2021)

€1,350.00

"Devotion" a pair of lovers made of bronze differently patinated. The devotion of this couple is clearly seen in the fluid movement of leaning. The posture of the figures is very important, how they relate to each other. There is often more expression in body language than in verbal communication. As far as possible Stefanie von Quast creates her bronzes herself, the model, the mold making, the wax models and after the bronze casting, which she leaves to an art foundry near Munich, the chasing and patinating. So she has the possibility to change and improve something at every step of the work.
