**€2,600.00**

A geometric mosaic like a winter wonderland. Icy blue in the sky, soft pink light - the cool, mysterious wonder of winter begins. The geometric design is based on several symmetries. Balanced, elegant colors, applied in many thin layers, create a harmonious whole that is also reminiscent of the sea or the sky, but in any case creates a positive mood. I bring passion and dynamism to every brushstroke. My aim is to create a visual geometric poetry that arouses emotions and inspires the viewer.
