

Sabine Schramm: Picture "Brittany (Plant no. 201003)" (2020)

"Who doesn't love this wonderfully wild land in France - Brittany, tartly charming? Since my early childhood, I am always drawn there. In this picture one of the original streets en with a view of the sea" The artist wants to tell stories in her paintings and develop a harmonious, positive sense of place. Each work is created from her strong visual and emotional memories, with her associated thoughts being as integral to the painting as the shapes, colors and especially the light.
